

Intelligent Multiple Functions Micro Drives

Applications

- Smaller cranes; washing machines; treadmills; robot arm of injection machine (clamp); elevator; grinding machine; drilling machine; wood machine; webbing loom; air conditioner for large buildings; water supply system for large buildings, etc.

Specifications

- Output frequency: 0.1~600Hz
- Modular & compact design
- Built-in PLC function
- Built-in EMI filter (230V 1 phase / 460V 3 phase)
- Optional Fieldbus Modules (DeviceNet, Profibus, LonWorks and CANopen)
- RFI-switch for mains
- Easy DC BUS sharing
- Flexible extension
- Complete Protection
