

Use: this bench allows you to place a conveyor belt on the rear side. This way, the operator may pick the components conveyed directly from his work station. Usually, the conveyor passes among different benches, arranged in a line. It may be customised with our full range of accessories.

State of supply: workbench complete with 1 workbench top, 1 tilting shelf, 1 LED lamp, 922 Lx light intensity (max 1254, min 504) (built-in power supply unit with power cable: 3 m plug CEE 7/VII), upper profile with 2 eyelets for hanging tools, 4 adjustable feet.
